Vision System Architecture

There should be four versions of the Vision System Gaming Consoles. This will make the product to have the utmost highest appeal and cater to the inherently vast demand that such an immersive interplay [contains.]

Apple Vision Systems - The Dream Garden

All hardware is stored in the flower vases, with the flowers as receivers for the glasses interlay. You can snap the stems and flowers together and bend them slightly to create whatever kind of mood/architecture you want, with some ability to change colors on the fly as well, or to keep the tempered glass transparent.

Vision Tulip: Only two maximum glasses/goggles allowed, it has an onboard album of thirteen games perhaps, with five being simple more or less for kids, five being complex and kind of fun, that most adults would appreciate, and two for passionate gamers- the really fun, immersive games. No online gaming capability unless you subscribe to the one or two games on Apple Arcade that allows such digital revelry. Those you can rent every month for a few bucks a month, with the option to switch out games every month as well.

Vision Lotus: Three max goggles, twenty four games on board with eight of them you can subscribe to apple arcade get for maybe five bucks a month, with some rotational ability in the subscription. Online play is enabled. Also, the system can support two functions at once so perhaps one person can watch a movie or sports, or play a game on their goggles in a separate room from the other users.

Vision Orchid: Eight max goggles, with maybe 120 games that can all be switched out at leisure for twelve or so bucks a month Apple Arcade subscription. Also has the Vision Pro ability to export creative files online. Up to three functions at once can be played on this system, streaming from different rooms if necessary.

Vision Bonsai: Up to thirty players, unlimited number of games at fifteen or so dollars a month subscription to Apple Arcade. Up to five functions at once is supported, with a wider range of goggles wifi connectivity as well.
